

# Katnapper Hanging Hideaway Bed (Patent Pending)

[www.Katnapper.com](http://www.Katnapper.com)

## Installation Instructions

1. Lie down on the floor beside your bed and determine if you have a bed slat in the center of your bed. If so, proceed to step 2. If not, add another bed slat in the center (a pine board 1" thick x 2" wide cut to the width between your bed side rails will work).
2. Lay the Katnapper on the floor under the bed with the short straps on top and the entry hole toward the foot of your bed.
3. Tread both of the short straps over the center slat and connect the hook & loop fasteners (Velcro®).
4. Pull the straps on the entry end of the Katnapper (toward the foot end) and thread each of them over the top of the foot bed slat and pull the ends back toward the Katnapper entry and attach the hook & loop fasteners (Velcro®) pulling them taut.
5. Pull the straps on the head end of the Katnapper (toward the head board end) and thread each of them over the top of the head bed slat and pull the ends back toward the Katnapper and attach the hook & loop fasteners (Velcro®) pulling them taut.
6. Introduce your small pet to the entry hole of the Katnapper and see if they will climb inside to investigate their new hiding place. A small amount of catnip may be used as an incentive, Meow!
7. Your pet is now ready to chill out in their new hiding place! When kitty needs "ME"-ow time!

## Care Instructions

1. Your Katnapper is machine washable on the delicate cycle using cold water. Hang to dry.
2. Remove the Katnapper by disconnecting all 6 of the hook & loop (Velcro®) fasteners.
3. Re-attach all 6 of the hook & loop (Velcro®) fasteners.
4. Reach your hand into the entry hole and turn the bed wrong side out and the straps will now all be on the inside of the bed.
5. Wash your Katnapper as instructed in step 1.
6. After it is washed, turn it right side out and lay flat or hang your Katnapper to dry.
7. Re-install your Katnapper. More "ME"-ow time for kitty!
